Lombartho 21-inch wheels for the Porsche Macan

With its wheel program „Lombartho“, the ELIA Tuning & Design AG which has traditionally been known as the leading tuning company for vehicles of the Renault-/Nissan alliance for 33 years is also able to serve many models of other brands.

The timelessly beautiful Lombartho wheels which are available from 16 to 23 inch are preferably used for top-of-the-range sedans and SUVs due to the possible very high wheel loads. With the available colors black front-polished, silver front-polished and glossy black with red rings, it is possible to combine the Lombarthos with many car colors. In the Porsche Macan, 9 x 21 inch wheels with the tire dimension 255/40 are mounted on the front axle and 10.5 x 21 inch wheels with a tire dimension of 285/35 are mounted on the rear axle. Those wheels and tires are approved by the German TÜV.

For further information, please contact Hans-Peter Walbrun under (0049)(0)9101-906910 or hp.walbrun@elia-ag.de. There, you may also request pictures or download them under www.elia-ag.de, Presse.
